PDX26011911

PATIENT		ORDERING PROVIDER		SPECIMEN	
Name	CHEN, MARGARET	Name	RAO, ANJALI MD	Type	Serum, SST
DOB	1967-08-14 (58F)	NPI	1659302147	Fasting	Yes (12 hr)
MRN	MRN-2026-04481	Practice	Berkeley Family Medical Grp.	Collected	2026-01-19 07:55 PT
Sex	F	Account	BFMG-022	Received	2026-01-19 12:14 PT
Phone	(510) 555-0148	ICD-10	E78.5; I10; E11.9	Container	Gold-top SST x2
Address	4421 Magnolia Ave, Apt 3B Berkeley, CA 94705	Indication	Hyperlipidemia f/u; HTN; T2DM	Volume	8.0 mL

LIPID PANEL WITH DIRECT LDL		LOINC 57698-3					
TEST		RESULT	FLAG	REFERENCE RANGE		UNITS	METHOD / NOTE
Cholesterol, Total		251	H	Desirable	<200	mg/dL	Enzymatic colorimetric
				Borderline	200-239 /		
HDL Cholesterol		47	L	Female	≥50	mg/dL	Direct, homogeneous
				Optimal	≥60		
LDL Cholesterol, Calculated		165	H	Optimal	<100	mg/dL	Calculated (Friedewald)
				Near optimal	100-129 /		
Triglycerides		192		Borderline	130-159 /	mg/dL	Enzymatic, GPO-PAP
				High	160-189		
Non-HDL Cholesterol		204	H	Goal (Total - HDL)	<130	mg/dL	Calculated

INTERPRETIVE COMMENTS

Continued partial response to lipid-lowering therapy. LDL-C has decreased from 178 to 165 mg/dL since the 2025-10-21 panel; total reduction since the 2025-07-18 baseline is approximately 15%. LDL-C remains at the borderline-high threshold. Given persistent elevation in a patient with T2DM and HTN, intensification of statin therapy (e.g., transition to high-intensity statin) is reasonable per the 2018 ACC/AHA Cholesterol Clinical Practice Guideline. Reference ranges per NCEP ATP III.
